1. This has reference to the comments of the Area Divisions on the subject study.

2. Division reaction varied in degree to which they benefited. Although some fail to recognize that speeding up the mail 2 - 3 times a week only to meet a once a week departure on a later leg does actually reduce the transit time for a percentage of the pouches over a part of the over-all trip, and thus a reduction in transit time does occur.

3. Our facts seem to have withstood the critical examination of the Area Divisions, as did our conclusions as to what can be done. We anticipated (as did the Exec. Officer, DD/P) a mixed reaction to the worthwhileness of the cost of the improvements.
